This report translates technical audit data into clear business intelligence — what is working, what is at risk, and what to prioritise first.

Table of Contents

This report covers every module run in this audit, organised for executive review through to detailed evidence appendices.

01	Executive Snapshot	Scores, benchmarks, biggest risk & opportunity
02	Unified Overview	Combined intelligence summary across all modules
03	Organic Traffic Intelligence	Modelled traffic, keyword footprint, top keywords
04	Domain Analytics	Organic vs paid traffic and keyword signals
05	SEO Foundation	Metadata, headings, alt text, technical issues
06	Performance & Core Web Vitals	Speed scores, LCP, CLS, FCP, TBT
07	AI Search Visibility	Brand mentions, model coverage, GEO readiness
08	Competitor Intelligence	Threat scores, shared keywords, winning factors
09	Keyword Gap & Labs	Missing keywords, opportunities, content ideas
10	Keyword Research	Seed keyword suggestions and intent signals
11	SERP Rankings	Live Google rank positions per keyword
12	Backlink Authority	Domain trust, referring domains, top backlinks
13	Technical SEO Audit	OnPage crawl status, pages, broken links
14	Content Quality	Page content, content analysis results
15	Local SEO	Business listings, ratings, reviews
16	Recommendations	Prioritised action cards from AI engine
17	Action Roadmap	30/60/90 day execution plan
A	Appendix	Full evidence tables for all modules

Traffic, keyword, and AI visibility estimates are directional intelligence derived from keyword visibility and CTR modelling. They should not be read as exact analytics data.

Executive Snapshot

High-level digital health, benchmark scores, and primary business risks at a glance.

Visual Score Breakdown

Key Business Insights

Keyword Coverage Gap

The website appears to have limited ranking keyword coverage compared to stronger competitors.

Low Organic Visibility

Organic traffic visibility appears weak or unavailable, suggesting growth opportunities in content and SEO.

Biggest Risk & Opportunity

& Biggest Risk

No major issue was detected from the available data.

'& Biggest Opportunity

AI visibility confidence improvement

Unified Overview

Combined intelligence summary: status, data coverage, source modules, and module-level execution results.

Key Metrics Overview

METRIC	VALUE
SEO Score	100
AI Visibility	70
Est. Monthly Traffic	0
Traffic Confidence	insufficient-data
Organic Keywords	0
Competitors Found	0
Backlinks	0
SERP Keywords Checked	1
SERP Found Count	0
Pages Crawled	8
Local Listings	0
Content Results	2

Organic Traffic Intelligence

Modelled from ranked keyword visibility and CTR curves. Treat as directional organic visibility, not exact analytics data.

EST. MONTHLY VISITS

0

Confidence: insufficient-data

DAILY VISITS

0

Monthly ÷ 30

KEYWORD FOOTPRINT

0

Ranked keywords

TRAFFIC SCORE

Insufficient Data

High / Medium / Low

Insufficient Traffic Data

Fewer than 50 ranked keywords found. Increase keyword visibility to improve confidence.

Traffic Intelligence Summary

METRIC	VALUE	NOTES
Est. Monthly Visits	0	Organic visibility estimate
Est. Daily Visits	0	Monthly ÷ 30
Keyword Footprint	0	500+ moderate, 2,000+ strong
Filtered Keywords	0	Low-volume (<10) removed
Confidence	insufficient-data	High requires 2,000+ ranked keywords
Data Method	ctr-curve	Clickstream ETV ! CTR fallback
Traffic Note	Estimated from	Directional, not analytics data

Domain Analytics

Organic and paid visibility signals from DataForSEO Domain Analytics API.

ORGANIC KEYWORDS

0

EST. ORGANIC TRAFFIC

0

ORGANIC COST

0

PAID KEYWORDS

0

METRIC	ORGANIC	PAID
Keywords	0	0
Traffic	0	0
Cost	0	0

Use this section to understand whether the domain relies more on organic discovery or paid acquisition for its current visibility.

SEO Foundation Audit

SEO Recommendations

Recommendation 1

Create commercial content around "Crawler Que — AI Website Growth Intelligence" and related buyer-intent searches to improve organic rankings and AI recommendation relevance.

High · 7–30 days

Recommendation 2

High · 7–30 days

Use competitor keyword gaps to create comparison pages, category pages, and educational content that targets missed search demand.

Recommendation 3

High · 7–30 days

Improve AI visibility for crawlerque.com by strengthening entity signals, schema markup, expert content, FAQs, and trusted third-party mentions.

Recommendation 4

Medium · 30–60 days

Fix priority technical issues such as mobile performance, missing alt text, weak metadata, and crawl depth problems.

Recommendation 5

Medium · 30–60 days

Build more authoritative backlinks and brand mentions from relevant industry websites, directories, publications, and partner pages.

Recommendation 6

Medium · 30–60 days

Improve content trust by adding reviews, case studies, author expertise, product/service proof, and clear brand information.

Performance & Core Web Vitals

PageSpeed scores and Core Web Vitals from Google PageSpeed Insights API.

AI Recommendations Engine

Prioritised strategic actions generated from real audit data across all selected modules.

RECOMMENDATIONS	SOURCE	PRIMARY OPPORTUNITY	TOP PRIORITY
6	Fallback Recomm	AI visibility confid	Immediate

Priority Recommendations

Priority 1: Create commercial content around "Crawler Que — AI Website Growth Intelligence" and related buyer-intent searches

Create commercial content around "Crawler Que — AI Website Growth Intelligence" and related buyer-intent searches to improve organic rankings and AI recommendation relevance. | Owner: SEO / Content

Priority 2: Use competitor keyword gaps to create comparison pages, category pages, and educational content that targets missed search demand

Use competitor keyword gaps to create comparison pages, category pages, and educational content that targets missed search demand. | Owner: SEO / Content

Priority 3: Improve AI visibility for crawlerque

High Impact · 7–30 days

Improve AI visibility for crawlerque.com by strengthening entity signals, schema markup, expert content, FAQs, and trusted third-party mentions. | Owner: SEO / Content

Priority 4: Fix priority technical issues such as mobile performance, missing alt text, weak metadata, and crawl depth problems

Fix priority technical issues such as mobile performance, missing alt text, weak metadata, and crawl depth problems. | Owner: Developer

Priority 5: Build more authoritative backlinks and brand mentions from relevant industry websites, directories, publications, and partner pages

Build more authoritative backlinks and brand mentions from relevant industry websites, directories, publications, and partner pages. | Owner: Growth Team

Priority 6: Improve content trust by adding reviews, case studies, author expertise, product/service proof, and clear brand information

Improve content trust by adding reviews, case studies, author expertise, product/service proof, and clear brand information. | Owner: SEO / Content

Add or improve meta descriptions

Medium · 0–14 days

Important pages should have unique meta descriptions around 140–160 characters to improve search snippet quality and click-through rate.

Build measurable organic visibility

High · 30–90 days

Organic traffic data is weak or unavailable. Build pages around commercial keyword gaps, improve indexing, and strengthen topical coverage.

Expand keyword footprint

Medium · 30–60 days

A stronger keyword footprint usually creates more organic growth surface area. Build supporting content and optimize service/product pages around relevant search demand.

30 / 60 / 90 Day Action Roadmap

A practical execution sequence for agencies, consultants, and growth teams.

Priority Execution Matrix

Priority	Focus	Timeline	Actions
Ø=Ý4 Immediate	High impact / Fast fix	0–30 days	Critical SEO, speed, metadata, crawlability, broken links
Ø=ßá Growth	High impact / Medium effort	30–60 days	Keyword expansion, AI visibility, content, landing pages
Ø=Ý5 Authority	Medium–high impact	60–90 days	Backlinks, topical authority, competitor coverage
Ø=ßâ Ongoing	Continuous optimisation	Continuous	A/B testing, CRO, monitoring, structured data

Roadmap Phases

First 30 Days — Fix the Foundation

High Priority · 0–30 days

Resolve critical SEO issues: missing metadata, heading structure, broken links, page speed, and crawl errors. Fast wins that improve indexing, UX, and conversion readiness.

Next 30 Days — Expand Visibility

High Priority · 31–60 days

Create or optimise pages around keyword gaps, commercial opportunities, competitor content, and AI-search friendly entity signals. Build content that ranks and converts.

Final 30 Days — Build Authority

Medium Priority · 61–90 days

Strengthen topical authority, improve internal linking, earn relevant backlinks, and monitor AI visibility improvements against the benchmark scores in this report.

Appendix — Supporting Evidence

Full data tables from each audit module for detailed review and client validation.

Appendix C — Keyword Gap Evidence

Keyword opportunity

Medium · 30–60 days

Create or improve content for this keyword opportunity. Search volume: not available. Current position: not ranking.

Keyword opportunity

Medium · 30–60 days

Create or improve content for this keyword opportunity. Search volume: not available. Current position: not ranking.

Keyword opportunity

Medium · 30–60 days

Create or improve content for this keyword opportunity. Search volume: not available. Current position: not ranking.

Keyword opportunity

Medium · 30–60 days

Create or improve content for this keyword opportunity. Search volume: not available. Current position: not ranking.

Keyword opportunity

Medium · 30–60 days

Create or improve content for this keyword opportunity. Search volume: not available. Current position: not ranking.

Keyword opportunity

Medium · 30–60 days

Create or improve content for this keyword opportunity. Search volume: not available. Current position: not ranking.

Appendix G — Crawled Page Evidence

Crawler Que — AI Website Growth	No	—	Not in top 100

Benchmark & Metric Reference

METRIC	RANGE	TARGET	WHAT IT MEANS
Overall Score	0–100	80+	Combined SEO, tech, visibility, authority, and growth readiness
SEO Score	0–100	80+	Title tags, meta, headings, crawlability, and technical foundations
Performance	0–100	75–90+	Loading speed and user experience, especially on mobile
AI Visibility	0–100	70–85+	Brand readiness for AI-style answers and generative search
LCP	Seconds	< 2.5s	Largest Contentful Paint — main content load speed
CLS	Score	< 0.1	Cumulative Layout Shift — visual stability
TBT	ms	< 200ms	Total Blocking Time — JavaScript interaction delay
Traffic Estimate	Visits	Directional	Modelled from keyword visibility and CTR — not analytics

Growth starts with clarity.

crawlerque.com should prioritise improvements that increase technical health, search visibility, authority, and AI discoverability. The goal is not just higher scores — it is turning this audit into a measurable growth plan.
